## SUMMARY

Motivated B.Tech student aspiring to build a career in Artificial Intelligence and Machine Learning. Skilled in data structures using Python, with strong analytical thinking, communication skills, and a collaborative team mindset. Passionate about solving real-world problems through AI technologies and continuously improving technical expertise.

## EDUCATION

**Bachelor of Technology (B.Tech) in Artificial Intelligence and Machine Learning, Anurag University** 2024 – 2028  
CGPA: 8.35 Hyderabad, India

## SKILLS

### SQL

Intermediate

### PYTHON

Intermediate

### Generative AI

## PROJECTS

### CROP PRICE PREDICTION FOR FARMERS 🔗

- AI predicts crop prices using past data and prioritizes crops with a priority queue to help farmers sell profitably.

### SALES FORECAST PREDICTION 🔗

- Sales forecast prediction estimates future sales using past data and market trends to help businesses plan production, inventory, and strategies.

## CERTIFICATIONS

- Data Structures and Algorithms 🔗
- Programming in C 🔗
- AICTE Internship 🔗

## CODING PROFILES

### Leetcode

### CodingBat (Python) 🔗

## Experience

**GeoNixa, Intern** 06/2026 – 08/2026  
Worked as an AI Intern at GeoNixa, contributing to real-time projects, practical assignments, and AI-based learning through mentorship and project-based training. Hyderabad
